Adaptateur PC bus LIN pour port USB

USB interface to connect a Windows computer to an automotive LIN network. The interface can be used as master or slave.
The software supports LIN description files (LDF) thus messages can be sent and received.

Caractéristiques techniques:
Automatic bit rate, frame length, and checksum type recognition
LIN bus connection via D-Sub, 9-pin
LIN connection short-circuit-proof against transceiver supply and ground
Adapter supply 5 V DC via USB port
Transceiver supply 6 - 28 V DC via D-Sub

Livraison:
