**Kit d'étude des transducteurs: Electro-mécanique -
chaleur - lumière -**

**ne comprend pas les résistances, multimètres,
oscilloscope, Documentation en anglais**

The measurements package is an instrumentation module with signal conditioning circuitry and includes a wheatstone bridge, oscillator, operational amplifier, discriminator and power amplifier.

The electro-mechanical kit includes 6 linear displacement transducers, namely a linear variable resistor, variable inductor, variable area capacitor, linear variable differential transducer (LVDT), variable distance capacitor and a strain gauge.

The heat transducers kit includes 4 thermal devices and a heat bar assembly with temperature gradient. It includes a thermistor, platinum resistance, a bi-metallic strip and thermocouple.

The light transducers kit comprises a light source, photoconductive cell, photodiode and phototransistor.

A power supply, leads and theory and experiment manual with 28 comprehensive assignments completes transducers teaching kit.
